

PROJECT PLANNING PHASE

SPRINT DELIVERY PLAN

Date	21 October 2022
Team ID	PNT2022TMID15455
Project Name	Early Detection of Chronic Kidney Disease Using Machine Learning

SPRINT DELIVERY PLAN:

Sprint planning is a stage in Agile methodologies in which teams decide which tasks to complete in an upcoming sprint and how that work will be achieved. A sprint planning meeting is a meeting that is dedicated to planning the next sprint. Sprint is one timeboxed iteration of a continuous development cycle. Within a Sprint, planned amount of work must be completed by the team and made ready for review. The term is mainly used in Scrum Agile methodology, but somewhat basic idea of Kanban continuous delivery is also essence of Sprint Scrum.
